

## **Inquiry no 1/2023/PLAYS**

### **Orderer:**

#### **Fundacja Innowacji dla Sportu VERDE**

ul. Sterlinga 27/29,90-212 Łódź.

NIP: 725-205-72-62

Verde Cluster for Sports Innovation (VERDE Foundation for Sports Innovation) will align the PLAYS project with the European policies on the digital dimension and virtual component by creating a platform that will support the consortium, TEAM members and all possible stakeholders in providing specialized open source information.

### **Subject of the order**

The digital dimension will be a focal point of the project, since it will be developed via a dedicated platform on the project website aimed at TEAM members, parents and all stakeholders, and it will be implemented educational activities for children and youngsters involved.

Those services (platform) will be integrated in a 3rd level domain ([www.playsproject.eu](http://www.playsproject.eu)) already existing under the project website (under construction).

### **The detailed description of the subject of the order and deadlines for the work**

#### **What should the platform include?**

A project website including a specific platform will facilitate the exchange among all relevant stakeholders with e-lessons, training materials, forums, etc.

Under the ordered service a digital platform, in English, will be set up to promote digital competences and favour the exchange of information, advises and knowledge among all possible national and EU stakeholders.

The platform will include training and informative materials and a virtual room for debates and discussions regarding the project topics, but also upcoming needs of professionals.

#### **Durability**

The platform developed during the project will remain active after the end of the project with the aim of reaching other beneficiaries across Europe.

**KPI:** Number of stakeholders reached with the platform

**Time of delivery:** summer-autumn 2023

#### **Scope of the order/functionality of the platform created as part of the order:**

1. Layout and preparation of basic and mobile mock-ups,
2. Wordpress implementation, layout implementation using Elementor Pro and adding 5 sample content pages/entries,
3. all basic features of Wordpress as a manageable CMS - more information at <https://wordpress.org/about/features/> (Categories, Comments, Users, Roles, etc.),
4. Ability to create content using an advanced content editor such as Elementor PRO or similar - features described here <https://elementor.com/features/editor/>
5. chat and forum (described below) :
